CLEAN VERSION OF THE AMENDED CLAIMS

August 14, 2002

Technology Center 2100

IN THE CLAIMS:

Please amend claims 19 and 27 as follows:

19. (Amended) A method of navigating data in a data warehouse stored in a data storage device connected to a computer, comprising:

receiving user input selecting a target object, said
5 target object derived from one or more sources of data via one or more transformations performed on said one or more sources of data;

selecting the target object in response to receiving said user input; and

10 providing information about at least one of said one or more sources of data.

27. (Amended) A computer-readable medium having contents for causing a computer-based information handling system to perform steps for navigating data in a data warehouse stored in a data storage device connected to a
5 computer-based information handling system, the steps comprising:

receiving user input selecting a target object, said target object derived from one or more sources of data via one or more transformations performed on said one or more
10 sources of data;

selecting the target object in response to receiving said user input; and

providing information about at least one of said one or more sources of data.
